Modern Dentistry. Modern Lifestyles.™

*Dentistry you need.  
Convenience you want.*

Is **E4D4U?**

same day dentistry

no temporaries

no messy impressions

natural esthetic look

**SAME DAY DENTISTRY**

We understand that your life is busy, which is why we've invested in an E4D Dentist system that enables us to provide you with the dental care you need and want in a single visit. We scan your tooth rather than take a conventional impression. Then, a custom restoration is designed to fit your unique smile, after which it is transferred to the milling unit where your crown, filling, or veneer is created right in our dental office. The final restoration is placed in your mouth the same day.

**DIGITAL SCANS**

Digital scans use the latest laser technology which is not only extremely precise, but also as safe as the check-out scanner at the grocery store. Unlike conventional impressions that can be messy, unpleasant, and cumbersome, a digital scan is clean and fast.

**NO TEMPORARIES**

The benefits of a single visit restoration go beyond saving you time. Your final crown, filling, or veneer can be seated in the same appointment so you can avoid the hassle of a temporary and a second office visit.

*Dentistry that fits  
your lifestyle*
